

REVCUT BLUE®

SHARPER - BETTER - LONGER - STRONGER

REVCUT BLUE® film backed products contain a special heat treated Premium P-grade aluminium oxide abrasive grain which provides higher stock removal and longer life than standard abrasive grain products. (Fig-1)

Long lasting high performance REVCUT BLUE® cuts extremely fast and with uniform finish. Designed for use in topcoat sanding, to remove excess orange peel, over-runs, and dust nibs. REVCUT BLUE® can also be used for light scuff sanding before painting. High performance REVCUT BLUE® is clog free and resists loading.

PRODUCTIVITY COMPARISON P240, P320

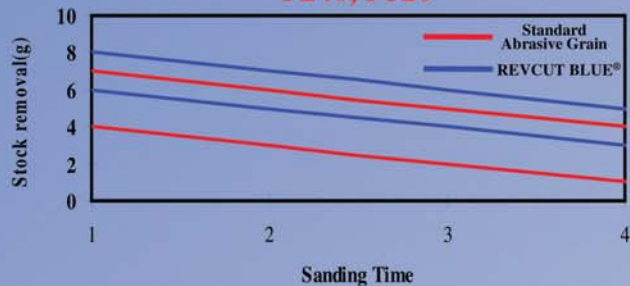

Fig-1

REVCUT BLUE® produces a uniform finish and together with the toughness and strength of a film backing is superior to standard abrasive paper-backed products. (Fig-2)

An exclusive anti-clogging coating resists loading, extending the cutting life. Open coat structure reduces loading and extends the abrasive cutting power.

FEATURE	BENEFITS
Premium heat treated abrasive	Faster cut rate
Film backing	Stronger, resists tearing Uniform finish on the work pieces Excellent durability Conforms easily to work-piece
Special top coat treatment	Greater resistance to loading
Complete grit range	P36-P2000
Superior bond system	Improved grain adhesion

REVCUT BLUE® CONSTRUCTION

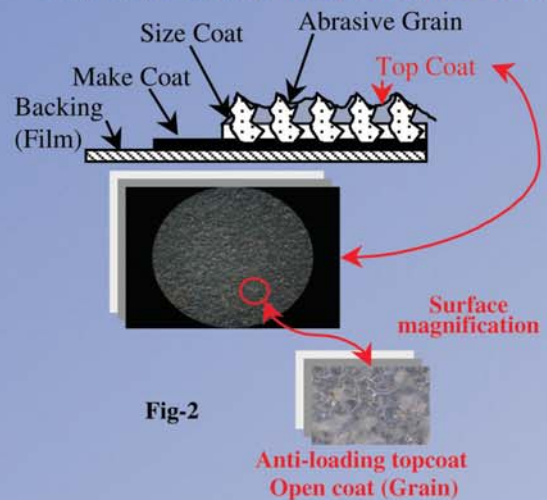

Fig-2

Specifically developed for the Automotive Refinishing Industry, REVCUT BLUE® is manufactured on the basis of productivity, durability and performance. REVCUT BLUE® uses an extremely tough, long lasting, high performing, premium P-grade aluminium oxide abrasive grain which is applied to superior film backing.

If you are looking for increased productivity to save you time and money look no further than REVCUT BLUE®.

APPLICATION SUGGESTIONS

- Sanding out feather edge, rust, spot and stone chips
- Fine sanding of round edges, contours and also convex / concave shapes
- Sanding new components and work primers
- Shaping of primer filler
- Scuffing of lacquers
- Sanding of filler / polyester / fibreglass reinforced plastic

AVAILABLE SANDER / GRINDER

- Paint & primer sanding in automotive industry (Dual action sander, Rotary disc sander)
- Hand & power tools (File board, Air file board)

REVCUT BLUE® Product Information

- Backing Material : PE film
- Grit range : P36 ~ P2000
- Bonding : Resin over Resin
- Grain Type : Premium P-grade aluminium oxide
- Coating State : Open coat
Special top coat to prevent clogging
- Available in : Sheets / Rolls / Discs
